

## Alberta's Wheat Production Slumps to Eleven Year Low

Alberta's wheat production this year was the lowest since 1924, according to figures announced in the Alberta Wheat Pool's "Budget" recently. The Pool's estimated yield for 1936 is 68,200,000 bushels, while the 1924 yield was 61,312,000 bushels—lowest figures in 16 years.

The highest yield recorded in the period was that of 1927, which was 171,286,000 bushels, 286,000 more than that of the following year. Other high yields and the years in which they occurred were: 1923, 166,834,000 bushels; 1916, 113,986,000 bushels; 1930, 132,900,000 bushels; 1931, 140,603,000 bushels; 1932, 167,355,000 bushels; 1934, 112,500,000 bushels.

For all Alberta grains there was a smaller acreage this year, according to the Pool. The 1936 acreage was 289,100 compared with 295,000 for the previous year. The yield was 341,000 bushels compared with 465,000 for 1935.

## Evangelical Church Notes.

A full attendance of all members of the Quarterly Official Board is requested on Friday evening, Oct. 2 at 8 o'clock. Matters of import to all will be discussed.

Communion Service will follow the morning service next Sunday. Rev. W. W. Krueger will be the speaker at both the morning and evening services next Lord's Day.

The Executive of the Albright Brotherhood met at the home of Mr. J. V. Berscht and appointed the various committees. The first meeting of the Brotherhood will be held the last Thursday in October.

## Thanks.

The Matron and Nurses of Didsbury Hospital wish to thank the Community Hall School Fair, and St. Cyprian's Church, for their kind donations of vegetables.

## New Officers Elected by I.O.D.E.

The election of new officers of the I.O.D.E. for the balance of the year was made necessary by the removal of officers from the district, and the election took place at the meeting held Monday evening at the home of Mrs. W. G. Liesemer.

Mrs. J. A. McGhee was elected Regent in place of Mrs. Lowrie who had left to reside in Calgary, and who has been in different offices in the Chapter since its inception ten years ago.

Mrs. C. R. Ford was elected 1st Vice-Regent and Mrs. F. Dunlop 2nd Vice-Regent.

Mrs. J. E. Huget was elected Secretary in place of Mrs. Russell Berscht who had moved to Innisfail.

Mrs. J. W. Phillipson was elected "Echoes" Secretary.

It was decided to celebrate the 10th anniversary of the installation of the Chapter next week. The Chapter was organized in September, 1926.

## Appoints New R.C.M.P. Inspectors

To fill the vacancy caused by the appointment of Inspector E. W. Bavin of the Calgary division of the R.C.M.P. to be chief preventive officer at Ottawa, Major-General Sir James McBrien, chief commissioner of the R.C.M.P., has permanently named Inspector P. H. Tucker of the Edmonton division as inspector at Calgary.

To replace Inspector Tucker at Edmonton, Sir James stated, Inspector G. C. P. Montizambert of Edmonton has been permanently named inspector at that division point.

Inspector Tucker has had a long career with the R.C.M.P., and the Alberta provincial force which the R.C.M.P. took over four years ago. Inspector Montizambert also has had many years of experience with the R.C.M.P. force.

Both appointments are effective immediately.

## WEDDINGS

At Knox United Church Manse on Wednesday, September 23, William Eggleton and Annie May Lucas, of Elkton, Rev. J. R. Geeson officiating. The bride and groom were attended by the bride's sister and Mr. C. A. Foss.

## Knox United Church Notes.

The pastor will have charge of the services at all points, and his sermon theme is, "A Fall Message."

It is hoped that we will get a Young People's Society organized this year, and the pastor will be glad to get the names of those interested.

We wish to remind our friends of the Fellowship Group that meets every Wednesday in the Church Parlor at 8 p.m.

The Bible Study Group will commence its Fall work next week. Watch for fuller announcement next week.

The C.G.I.T. Groups have re-organized and will meet on Friday.

## Didsbury High School Triumph at Basketball

Coming back with a vengeance from a recent defeat at the hands of the Olds High School Girls' Basketball Team, the Didsbury lassies won a closely contested basketball game from their Olds opponents Monday of this week, by a score of 10-8.

The game was featured by close checking and smart combination. Never, until the final whistle, was the issue of the contest a certainty. B. Patmore was the most effective player for the defeated team.

W. Adshead, M. Burns, E. Barrett and E. Boorman were pillars of strength for the Didsbury forward lines. The defensive play of O. Gabel and E. McGhee proved an important factor in breaking up the rushes of the Olds team.

Miss R. Liesemer refereed the game efficiently.

Thanks to the courtesy of Miss A. Sheils, the Didsbury girls were able to entertain the Olds team at a luncheon, following the game.

## Lineups

Didsbury: Burns (Captain), Boorman, Sheils, Barrett, Adshead, Geeson, McGhee, Gabel, Caithness, Mr. D. Cameron, Coach.

Olds: Patmore (Captain), Black, White, Taylor, Valdez, Leckie, Fife, Cuthbertson, Fife, Webb, Miss M. Smith, Coach.

## Predict Big Cut In Carryover

An estimate by the London Times that Canada will have exported about three-quarters of its exportable wheat surplus by the end of next January was backed up last week in part by the Dominion Bureau of Statistics estimates that the nation has only 242,000,000 bushels of exportable wheat. The bureau said it believed "Canada will export enough wheat during 1936-37 to reduce her 1937 carryover to a very modest proportion."

## Canadian Stamps Will Display New King's Likeness

The likeness of King Edward that has aroused controversy in the United Kingdom will appear on the new issue of Canadian postage stamps, but the reproduction will be made by steel engraving, and not by printing as in the case of the Old Country stamps. In addition Canadian stamps will have some kind of border decoration lacking on those of the United Kingdom. Complete details of the design are not yet available.

## C.G.I.T. Reorganization.

The reorganization meeting of the C.G.I.T. was held Friday evening, September 25, in the Knox United Church.

Two groups, senior and intermediate, were formed, the leaders being Miss Dorothy Ranton and Mrs. Wilfred Klein.

Departmental officers elected were President: Betty Boorman, and Secretary: Florence Chamberlin.

## Bride-Elect Honored.

A shower was held at the home of Mrs. D. Evans on Monday afternoon in honor of Miss Audrey Hosegood, bride-elect of this week. A large number of friends were present, and fifty-six quilt blocks were made, finished and presented to Miss Hosegood, together with a purse of money with which to purchase a complete set of silverware. Lunch, served by the hostess, brought to a close a very pleasant afternoon.

Monday evening Mrs. Novacluse was hostess at a social evening at Rugby School in honor of Miss Hosegood and Mr. W. Tryonok. Cards, dancing and a short program were enjoyed. Mr. Billy Brown's orchestra providing the music. The young couple were recipients of many presents and received the well-wishes of their many friends.

## Barbers' Code Soon Expected to be Made Effective Locally

Calgary district of the recently-formed Alberta Barbers' Association had already exceeded its quota of barbers agreeing to the proposed barbers' code, and the code itself is expected to go into effect within a matter of weeks.

The province has been divided into four districts with Calgary, Edmonton, Medicine Hat and Lethbridge as the centres, with officers for each district. All barbers are being circularized to learn if they consent to the code. Sixty per cent is the maximum of signers necessary in each district.

The code, a provision of the Trade and Industry Act, calls for each barber to receive 60 per cent of his takings, with a minimum of \$15.00 per week. It also sets a price of 35 cents for a haircut.

## Legion Members Hear of Vimy Pilgrimage

An interesting story of the Vimy Pilgrimage was given by Mr. Arthur Foulds, of Delburne, to the members of the local branch of the Canadian Legion at their regular meeting on Saturday evening.

Mr. Foulds gave a graphic account of his travels. He told of the unveiling of the Memorial at Vimy Ridge; of the services at Westminster Hall in London, and of the splendid entertainment given by the French Government when they took the pilgrims on a tour of the battle fields. He spoke of the wonderful recovery that country had made, remarking that there was very little evidence left of the shell-torn country.

Perhaps the most interesting part, however, was when the boys started asking questions and reviving memories of the time when they were "over there."

Mr. Ed Craig, on behalf of the boys, moved a vote of thanks to the speaker for a most interesting evening.

During the business part of the meeting, preliminary arrangements were made for the annual celebration of Armistice Day on November 11. It was also arranged to hold a bridge and whist drive after the October and November meetings. It was pointed out that members who took part in the drives were expected to be at the business meetings at nine o'clock.

## WEEKLY SERMONETTE

"Three-fourths of the difficulties and miseries of men come from the fact that most want wealth without earning it, fame without deserving it, respect without virtue, and happiness without holiness."

## Notice.

The Local Elevator Men wish to announce that —  
**COMMENCING**

**Wednesday, October 7th**

All elevators will be closed on Wednesday afternoons at 1 o'clock.

Also on other holidays as taken by local business houses.

## SPECIAL SALE OF 1937 BATTERY RADIOS!

### The "Addison"

In the Addison Economy Battery Radio we are offering you one of the best engineered radio sets for performance and economy of operation that it is possible to get in a radio employing the same number of tubes.

The engineers of the Addison radio have made it possible for you to save as much as \$25.00 on 1937 Battery Radios and to enjoy the station-getting ability and tone quality of seven and eight tube sets, with the new low levels of operating economy.

Five tube chassis giving Seven Tube Performance.  
Three gang condenser for greatest selectivity.  
Specially designed coils for greatest sensitivity.  
New combination of multi-purpose tubes for greatest economy of operation.  
Variable tone control.  
Telegraph rejector circuit.  
Clear reading dial.  
Permanent magnet dynamic speaker using alnico magnet.  
Cabinet of selected walnut veneer, ruggedly constructed.

Mantel Model **\$38.50** Console Model **\$55.00**  
Complete with Tubes, less batteries

## A Quid Pro Quo

If the Dominion government is to open the gates ajar for the admittance of more British migrants to Canada on a colonization basis, it would seem appropriate to suggest that any agreement which may be made should include some provision for the sale of more Canadian produce in the Old Country.

From the viewpoint of Western Canada where new settlers must necessarily engage in a competitive venture with farmers who, in recent years at least, have been forced to offer their wares in narrowing markets, such a proposal would only be a reasonable quid pro quo for accepting new settlers.

It is true that colonization schemes in general and the Hornby scheme in particular, which are now being mooted and are apparently being accorded serious consideration in some quarters, contemplate safeguards to ensure that for at least five years after admittance to the country migrants would not become charges on the administration and that failures would be returned to the country of their origin.

While this may be regarded by some people as satisfactory on the face of it, such safeguards are not sufficient for the protection of thousands of farmers in the prairie provinces who during the past five or six years have not only experienced the greatest difficulty in making a bare livelihood but have had the misfortune to stagger—and are still staggering—under an accumulating burden of indebtedness.

Such colonization schemes, insofar as the west is concerned, have land settlement as their objective which means, of course, that the newcomers will be engaged in the production of agricultural commodities. If they are successful in their efforts the volume of produce offered for sale must necessarily increase with a resultant tendency to reduce returns to all producers of similar commodities.

The only way that this trend can be offset is the creation of new or expansion of existing markets for such produce and the latter might be attained by agreements which will ensure a greater volume of sales of Canadian farm products in the country from which these migrants come. Such agreements, if consummated, coupled with rigid guarantees that the new settlers will be self-supporting, might be expected to at least minimize any indirect loss which the older settlers would sustain as a result of ensuing competition.

New Zealanders, who have been sounded out on the subject of British migration to their country have something of the kind in mind, as evidenced by the report of William Teeling, who recently visited Australia and New Zealand to examine opportunities for British settlement in the two Antipodean countries for, with respect to New Zealand, he is quoted in a recent issue of the London Times as stating:

"From both these Dominions I came away with the impression of young people in young countries convinced of the future of their race, convinced that they had something to interpret from the West to their neighbors in the Far East, and convinced that they still had a lot to do in their own countries before they were ready to admit too many strangers. They seemed, however, quite willing to admit a few under careful and proper auspices.

"It struck me that the best opening was in New Zealand, and that there it could only be achieved through the New Zealand Government (no other large body being sufficiently interested) and by a definite economic bargain for the purchase of New Zealand goods."

Without going into details of the reasons advanced, Mr. Teeling found that prospects for British migration to Australia were practically hopeless at the present time.

Thus it would appear that any British colonization in New Zealand must necessarily be very limited and must be accompanied by an economic pact as a consideration, a suggestion that should certainly be given great weight by Canadian authorities before any agreement is entered into for additional colonization in this country.

Proponents of further colonization in this country have argued that new settlers are consumers as well as producers. This is true, but if they are to be successful they must produce more than they consume, in which event a market must be found for the excess production somewhere. If they do not produce more than they consume, colonization is for them a failure and it would be better for them and the country, if the scheme were abandoned before birth.

### Professor Makes Discovery

#### Finds Green Peppers Contain The Precious Vitamin C

The green peppers that Professor Albert Azent-Gyorgyi, Szeged, Hungary, spurned at dinner one night gave him the chief source of precious vitamin C he had sought for a long time.

On that particular evening his wife had revoked her ban on his after-hours work, and he retired to his laboratory to continue his hunt for the anti-scurvy substance.

He took the peppers with him, intending to eat them later. But instead, he subjected them to tests just as he had almost everything else available—and found what he wanted in the vegetables that abound in the neighborhood.

In a few weeks he managed to produce a pound of pure vitamin C from 4,000 pounds of green peppers which, he discovered, have four times the vitamin C content of oranges and lemons, and are cheaper.

### Government Cleans Mint

#### Expects To Recover Large Amount Of Gold Dust

Housecleaning may mean dust and dirt to most people, but it means gold, running to thousands of dollars, for the Royal Canadian Mint at Ottawa. When the smelting furnaces at the mint are moved to the new wing, officials of the institution where all Canada's coinage is made and all gold handled, will thoroughly clean the rooms being vacated. According to J. C. Campbell, master of the mint, it is expected that a very large amount of gold will be recovered in the process of cleaning the floors, ceilings and walls.

This reclaimed gold consists of billions of tiny particles which have been carried off by smoke and gases from the huge smelting furnaces and which eventually come to rest on the walls and floors of the rooms.

### Another Mystery To Solve

#### Reason Silica Turns Into Poison When Pulverized

Science has one mystery yet to solve in silicosis, the most dangerous of all dust diseases.

The mystery is why silica, the dust responsible, turns into a poison when ground to particles the size of bacteria. The surprising behavior of silica was explained at the Harvard tercentenary by Dr. W. Irving Clark and Prof. Philip Drinker at the Harvard school of public health.

Beach sand is almost pure silica. Silica is part of the beauty of opals and occurs in quartz, flint, sandstone, jasper and many other common substances. In all of them it is harmless to human beings.

When ground fine enough to fly in the air particles of silica cause a distinct, new lung disease. 2167

### Not Very Long Ago

#### Boston Had By-Law Forbidding Bathing Without Doctor's Order

Cleanly Anglo-Saxons on both sides of the Atlantic have been shocked at the revelation, by an American plumber who has just returned from a European tour, that though the Hohenzollern Palace at Potsdam contains 600 rooms, there are only two bath-rooms in it. And the plumber found, also in Germany, a castle of 260 rooms which had no bath-room at all.

But there was a time when the Boston city fathers passed a by-law forbidding anyone to have a bath except by doctor's orders, and this was not repealed till 1862. Again, just over 100 years ago, when the Lord Mayor of London asked for a shower bath to be installed at the Mansion House the request was refused, as "the need of same has not been heretofore complained of."—London Answers.

### Little Animal Has Courage

#### Man Tells How Gopher Rescued His Helpless Mate

The gopher, unassuming and somewhat ratty animal, attains heights of courage that merit him a better name, says A. D. Bain, superintendent of a chain of bungalow camps in the Canadian Rockies.

On a recent inspection trip, Bain saw as he approached in his car an injured gopher lying helplessly in the middle of the road. Nearby stood another of the little animals, bristling and showing his teeth, although obviously frightened.

When Bain stopped the car, the second gopher put his teeth into the scruff of his dying mate and dragged her to the safety of the long grass beside the mountain road.

### Lightning Kills Birds

#### Found Underneath Large Tree Which Was Not Struck

Included among the freaks of the severe lightning storm which struck Raleigh, North Carolina, was the electrocution of between fifty and sixty sparrows roosting in a tree which was not struck by lightning. The sparrows were found underneath the large tree. Since the tree was not struck it is believed the heavily charged air, coupled with the current given off by electric wires in the vicinity, resulted in the electrocution.

### Just Recently Known

Twenty-five per cent. of the vegetables and fruits people eat were unknown even ten years ago. They come from strains of plants that didn't exist a decade past. Cantaloupes, for instance; a popular item on many tables. A few years ago it was scarcely possible to produce them because they were afflicted by a mildew. A scientist discovered a species in India that resisted mildew and, by cross breeding, made the plants of this continent.

### Has Supple Fingers

Leo M. Stenzler, of Waiters' Union, No. 16, of New York City, by the genius of his supple fingers, can produce, at a moment's notice, from a plain table napkin a bishop's mitre, a wedding candle, a sailboat or a clown grinning under a fool's cap. He demonstrated his prowess recently before a meeting of the Hotel and Restaurant International Alliance in Rochester, N.Y.

## "The Object of his Affections"

You said it—Ogden's Fine Cut! Men who roll their own cigarettes have a yen for Ogden's, because Ogden's *does* roll a cooler, sweeter, smoother smoke. If you're not already acquainted with Ogden's, take a little tip—try this mellow, fragrant cigarette tobacco. Yes, sir, you'll like Ogden's Fine Cut and you'll like the way it's packaged, too—Cellophane-wrapped with the purple easy-opening ribbon. Be sure to choose the better papers—"Chantecler" or "Vogue".

# OGDEN'S FINE CUT

P.S.—Your Pipe Knows Ogden's Cut Plug

### SELECTED RECIPES

#### PUMPKIN PIE

- 1½ cups pumpkin
- 1 dessertspoon flour
- 1 cup sugar
- 1 teaspoon ginger
- 1 teaspoon cinnamon
- ½ teaspoon nutmeg
- ½ teaspoon mace
- ½ teaspoon salt
- 3 eggs
- ½ cup milk

Mix pumpkin, flour, sugar, spices and salt together; beat eggs, add milk and stir all well together. Pour into a deep pie plate lined with good pastry. Bake until firm (about 35 minutes) in a moderate oven.

Apricots, peaches, pomegranates, and oranges were referred to by the ancient Romans as "apples." They distinguished the fruits by the names of the countries where they were grown.

### Hundreds Of Suggestions

#### Lord Mayor Of London Receives Ideas For Memorial

Several hundred suggestions for a King George Memorial have been received by the Lord Mayor of London and he and the King George Memorial Fund is considering them. Among them are renaming Trafalgar Square, King George Square, removing Nelson's Column and the Lions to Tower Hill, erecting statues of King George and his four sons, and placing the Cenotaph in the centre of the square are some. A flood-lit Mausoleum in Hyde Park is another. The erection of a colossal flood-lit statue on the cliffs of England, near Le-on-Solent, similar to the Statue of Liberty in New York, visible at sea for 20 miles, is still another.

According to a correspondent of Collier's, an undesirable alien is a foreigner who makes more money than he does.

## Marked Reduction In The Sale Of Canadian Wheat To Scotland Has Been Predicted

Scottish bakers who for generations have made bread by the long fermentation process are shifting gradually to the short fermentation method and the result may be a reduction of Canadian wheat purchases, Harry Miller, cereal technologist of the experimental farms, stated in a report to Hon. James Gardiner, minister of agriculture.

Returning from a study of milling and baking methods in Europe, Mr. Miller provided a summary of the results of his inquiries. He investigated particularly dough testing machines and chemical methods developed in Europe in recent years, so that in selecting seeds for plant breeders in Canada efforts may be made to meet these developments.

"While wheat from the Dominion," Mr. Miller said, "is recognized in Britain and the European countries as the best wheat grown, the principal factor to be considered so far as England, in particular, is concerned is price. England is one of the larger buyers of wheat from Canada, but flour milled in that country contains only an average from 40 to 50 per cent. Canadian wheat.

The remaining 50 to 60 per cent. may be made up of lower priced wheat from as many as 11 different countries. Judged by the standard of the Canadian loaf, the English bread is not as good.

"A different situation, however, prevails in Scotland. There the bread may be made of 100 per cent. Canadian wheat and consequently the Scottish loaf is considered equal, if not better flavor, than that made in Canada. While the Scottish baker, like other bakers, is naturally concerned with the price factor, the general custom for generations over there has been to make bread by the process of long fermentation, which improves the flavor of the loaf.

"To follow this process the highest quality of wheat flour must be used and Canadian wheat therefore is sought. But the short fermentation method, which is followed in most other modern countries, including Canada, is gradually being adopted in Scotland and if it ultimately becomes general the result may have an effect on that excellent market for Canadian wheat.

"Though France is a white-bread eating country little Canadian wheat is used, since its importation is greatly restricted.

In Belgium the people eat white bread and about 50 per cent. of Canadian wheat is used in the manufacture of Belgian bread flour. They are convinced the wheat from Canada is as good a product as they can get anywhere. Practically the same situation prevails in Holland.

"In Germany rye bread is consumed to a great extent, this being made from the home-grown cereal. Most of the wheat flour used goes into the production of breakfast or morning rolls that are so well known to travellers on the continent. The larger breads are usually made from rye or wheat-rye mixtures. Scarcely any Canadian wheat finds its way into Germany at the present time. The national policy favors the use of rye bread and rye is grown abundantly in Germany and is a very productive crop."

### Not Guaranteed

#### Demonstrator Said Stingless Bees Will Sting If Hurt

Henry Brown of Cape May Court House, N.J., took a hive of "stingless" bees to the Philadelphia Beekeepers' Association meeting.

He filled his hat with them and put it on his head. He placed them in his mouth. So convincing was his demonstration that others tried it.

But it took four-year-old Ilena Brown to prove they could sting. Brown said she must have squeezed the bees too hard in getting them out of her hair.

"Though these stingless bees are very gentle and long suffering," he said, "they, like the worm, will turn."

Evergreen trees shed their leaves completely every three to five years, but the process is gradual and unnoticed.

### Rare Plants Found

#### Unusual Floral Growth Discovered In Land Of Incas

Macchu Picchu, the only city of the ancient Incas that was not destroyed by Pizarro, still yields rare botanical findings, according to Dr. T. H. Goodspeed, director of the Botanical Gardens of the University of California.

As the result of a trip made to the Andes last year, some members of which have still remained behind and revisited the ruins of Macchu Picchu, over 5,000 specimens of floral growth and tobacco plants have been obtained and sent to the University of California.

Some of these already are growing in the botanical gardens of the university and samples of nearly all have been sent to Harvard University for further assistance in identification.

Macchu Picchu, the ancient Inca city from which many of these plants and flora came, is situated near the summit of the Peruvian mountain on which the Incas believed the sun remained chained during the day time.

It was discovered in 1912 by a Yale expedition under Hiram Bingham. With the exception of the missing thatch roofs, the ruins were in a state of perfect preservation. Its isolation is supposed to have been due to the fact that the Incas regarded the city as a place of refuge, and it is presumed a number of them assembled there to avoid Pizarro's flaming progress.

Near the city were found specimens of the famous calceolaria, growing to a height of nine feet, with enormous flowers and leaves. In its known garden forms, the plant rarely attains a height of more than two feet.

A rare orchid specimen also was found growing in an exposed position on the bare, granite slopes of the city, where usually the orchid is a parasitic growth on another plant.

Efforts will be made to cultivate both in California.

### Rats Devouring Crops

#### People On Tristan da Cunha Island Are Facing Ruin

The descendants of rats which swam ashore in 1882 from wrecks to lonely Tristan da Cunha Island, halfway between South Africa and South America, threatened to bring ruin to the little island population and force them to move.

Officers of the British freighter Harmola, which arrived recently at Durban, South Africa, on its way from South America to Japan, said the rats this year are devouring all the crops before they mature.

So ravenous have the rats become the officers said, that they are eating pages from the family Bibles of the islanders. There are five Bibles for each of the island's 157 inhabitants.

The fate of the islanders will not be known, probably, until next Christmas when a British ship makes its annual visit with mails and supplies—which this year will contain an extra supply of rat poison.

Anxiety is great because in 1929, when the potato crop failed, the islanders were on starvation rations when the Christmas ship appeared.

### Only One Complaint

A Swedish farmer who wanted to make his permanent home in this country appeared for his naturalization papers.

"Are you satisfied with the general conditions of this country, Mr. Olsen?" he was asked.

"Yah, sure," answered Olsen.

"And does this Government of ours suit you?"

"Well, yah, mostly," stammered the Swede "only I lak to see more rain."

We have seven senses. Five of them will take care of themselves. Two need cultivating—common sense and a sense of humor.

The dynamos on the S.S. Queen Mary are capable of supplying light and power for a city of 150,000 inhabitants.

### Reports Too Pessimistic

#### Alarm Over Canada's Wheat Crop Is Not Warranted

It is apparent that the estimate of Canada's wheat crop has been causing a state of alarm over the country. But Dr. H. Barton, deputy minister of agriculture at Ottawa, warns that unduly pessimistic reports have been circulated. Although he adds that "it is definitely known that the harvest this year in Western Canada will be one of the poorest in several years," he contends that conditions do not call for sensational statements. Already, according to dispatches, many farmers have reaped far better crops than they expected, and Dr. Barton stresses the fact that many of the extreme announcements on the ultimate harvest lack authority as well as accuracy.

The critical situation is in certain districts which have been hit by drought for several years in succession. Some of these areas will have no crop at all. In other parts of the prairie provinces—central and northern sections—farmers will get a good price for a fairly heavy harvest.

The estimated crop of some 250,000,000 bushels is a far cry from the bumper yields of between 400,000,000 and 500,000,000 bushels—yields which have been known in the past.

An "average" yield is still somewhat mythical. Yet even in this dark hour for many western farmers there is the promise that the glut in the world markets will be eliminated, and that with any luck next year they will have the best prospects for a long time.—Hamilton Spectator.

### Speed Means Danger

#### Unnecessarily Fast Driving Is Menace To All Traffic

High speed on the highways has become so common that sense of proportion seems to have been lost. There are few circumstances that require travel at sixty or even fifty miles an hour. The main occasion is the craze of the driver for making the journey in the shortest time possible. After he has put the lives of others in danger in the process he probably has plenty of time to idle away. That time could have been better spent in driving safely.

Other conditions being equal it is indisputable that the greater the speed the greater the danger. Unnecessarily high speed and recklessness are interchangeable terms. The authors of "Sense and Safety on the Road" assert that if the entire motoring population reduced speed to 20 miles an hour for a trial period the number of fatalities would decline in the proportion of thirty to one. It is not hard to believe. But it won't happen. It can't when the speed mentality has progressed so far as to suggest that the motorist who drives at twenty is next thing to a public enemy and should be dealt with as a criminal offender against the laws of safety.—Toronto Telegram.

## Canada Played Great Part In Creation Of New British Empire

### No Advance Notice

#### Signs Which Predict The Weather Are Not Reliable

Throughout last winter and this summer, the weather has displayed freakish tendencies. On one occasion, for a week or more in July last, there was a heat spell that shattered previous records and left its toll of sick and dead throughout the continent.

About this time, as the almanac used to say, the weather prophets tell us what kind of a winter we are going to have. There are the goose-bone prophets, and those who observe the fur of animals and see other nature signs. Animals sometimes seem to have a kind of mysterious power to foresee weather developments not visible to human eyes.

Some weather signs appear merely fantastic, like the supposed appearance of the groundhog on February 2. Also, the theory that the weather for a month is patterned after some particular day at the close of the preceding month.

Many persons regarded it as possible that nature in some unaccountable manner does provide for her creatures by giving them thicker coats of fur with which to meet a hard winter. It would seem a more likely theory that a thick coat of fur is the result of a summer during which the animal food has been abundant.

If there are plenty of nuts, you can expect the squirrels will look very prosperous and silky. They will strut around as proudly as the handsome dame with the beautiful new fur coat. But if the summer has brought drought, the nuts will fail to mature, and Mr. Squirrel and his fur look poor and stunted.

The heat of the sun, the moisture of the air, the rotation of the earth, are strange and mysterious forces that largely shape our weather. Who can tell what they are saying to us about next winter or what storms and sunshine they are planning in the heart of great oceans, or in the icy solitudes of the poles?

The Bible says the wind bloweth where it listeth. It does not seem to tell us much in advance which way it is going to blow. Perhaps some day we shall learn its secret.—Sarnia Canadian Observer.

### Take Opera To Arctic

Some of Moscow's most famous singers and ballet dancers and a first class theatrical company are taking the opera into the Arctic this season and arousing enthusiasm among the Northern Siberians who are seeing the glories of the theatre for the first time.

## Cross Stitch These in Wool or Silk

Household Arts by Alice Brooks

They Are Done in No Time

### PATTERN 5682

They're the best of friends—this bright cross stitch kitten and handsome bull-pup. And see what an engaging pair they make on these charming pillows—they do equally well as companion pictures! Effective in wool or silk, these bright accessories make ideal gifts or bazaar donations singly or in pairs. In pattern 5682 you will find a transfer pattern of a dog 6 1/4 x 6 1/2 inches and a cat 7 1/2 x 7 1/2 inches; material requirements; color suggestions; illustrations of all stitches needed.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Canada had every reason to be interested in the new British empire, for it was largely of her creation. Lord Tweedsmuir said in an address to the Canadian club in Vancouver.

He traced empire growth to the days of its present conception and asked of its future course.

On one point it must get its ideas clear, its security in a distressed world and what contribution it could make to that international peace on which depended the security of civilization.

"I see no hope in the ideal which attracts some people—that of a compact and self-contained empire, with a common defensive system under which the whole would guarantee the security of every part. There would be enormous difficulties in the way of framing such a system, and even if it were achieved it would not meet the difficulty. For the British empire, potent as it is, is not potent enough to stand alone in the world.

"I think this is generally realized, and that is why Britain and the Dominions have from the start labored to secure, through the League of Nations, a system of world-wide collective security.

"That is a great ideal which we must never relinquish; but it is clear, I think, that the original League of Nations was devised on too ambitious lines. We tried to create something full-born and complete, instead of something which could develop slowly. It was meant to be a world system and a coercive system; but the absence of the United States from it made it from the start an imperfect structure with a far too cumbersome procedure. I think it is generally agreed that some revision is necessary, and that for the present the league will have to be organized more modestly; less on the lines of a world state than of a clearing house for consultation and discussion. That is not what we once hoped for, but nevertheless such an organization would be of the highest value in clarifying men's minds, for it is mental confusion far oftener than malevolent intention which leads to war.

"It would not be proper for me to enlarge on this matter, or on what regional agreements for security may be necessary as intermediate machinery before we can attain a true internationalism. For no country today can afford to be without a foreign policy. We in Canada are far enough from the old world, with its troubles; but we have the Pacific at our door, and beyond the Pacific are many difficult problems awaiting settlement. The world has shrunk today and there is no part of the globe which can say that its geographical position renders it immune from danger."

"What exactly does the British empire mean today?" asked His Excellency in his opening remarks. "The empire now is an alliance of sovereign states—no more and no less. I wonder if you realize how great a part Canada has played in its making. I think it may fairly be said that our new imperial theory is principally the work of Canada—first foreshadowed by Sir Wilfrid Laurier, then emphasized by Sir Robert Borden during and immediately after the war, and finally supplemented by the work of the present prime minister of Canada at the 1926 conference. Canada has every reason to be interested in the new empire, for it is largely her creation."

### Hens Need Lime

#### Necessary To Get Shell Producing Material Into System

A four-pound hen laying 150 eggs in one year produces enough egg shell to equal about half her body weight. To do this, she must get shell producing material into her system, assimilate it and transfer it to the egg shell. Shell producing materials are calcium and phosphorus, obtainable in oyster shell, limestone grit, calcite, and bonemeal. To a certain extent lime is present in meat scrap, milk, and the grains which make up the ration, but not in enough quantities to take care of the needs of a heavy laying hen.

**FIRE** Prevention Week, October 4th to 10th, is set apart for National observance in order that once yearly the attention of our people may be directed to the tremendous loss of life and property by fire, and in order that public sentiment may be crystallized into action.

In our busy life we are too prone to put off things we actually do not have to do. "Yes, that is a good thing and well worth doing, but I will do it just a little later." In our club life, and we have many good ones, there is too much of a disposition to endorse things that are worthy. We are for it, and believe it should be done. We endorse it 100 per cent, but you do it. That is too often what an endorsement means. Clubs are a very useful part of our social and commercial fabric, but too often they are used by individual members as a convenient means for "passing the buck."

Now public endorsements are good. We need them to aid this great work, but what we need more is the individual interest and personal effort of everyone. We need men and women who will work and not wait for results. The causes of fire are comparatively simple. That is, the majority of them are. The chimney, stove, furnace, and smoke pipes or heating equipment rank first. Then comes electricity or other means of lighting, followed by poor housekeeping, rubbish, smoking, matches, and various careless personal habits. The common hazards enumerated cause more than half of the fire loss, and they are strictly preventable. Who would admit that they could not safeguard the common fire hazards in their home if they chose to use their intelligence in that direction? It is safe to say not one would make such an admission. Anyone of average intelligence can avert the danger from fire in their home, but how few there are who make the effort, and what terrible consequences follow their neglect.

### Menace of the Ash Pile.

Fifth on the list of causes of fires in Canada in 1935 was the careless handling of hot ashes and coals. Almost 2,000 fires entailing a quarter of a million dollars of loss were directly traced to this cause.

Ashes thrown out in the streets, alleys and backyards, or put in open or wood receptacles, are dangerous, and are a nuisance. Of course, persons throw them out thinking there is no fire left in them, but perhaps there is just enough to start the flame when fanned by the wind. Wood ashes contain a great number of little pieces of charcoal, which do not burn because there is not enough air given to the fire. The carbon in these little pieces, uniting with the oxygen of the air, causes spontaneous combustion in the ash pile, which easily becomes overheated when moist. The moisture gathered from the ground or from rain is necessary to the spontaneous igniting of these particles in the mass. Do not allow waste paper, rags or rubbish to be thrown in with ashes, for when the ashes become damp and overheated (causing spontaneous combustion) this waste material is there ready to take fire. It may also take fire when a lot of hot ashes is emptied on the pile.

Many buildings are burned each year by ashes from stoves or grates

## Rosebud Inter-School Track Meet.

The annual Rosebud Inter-school Athletic Meet will be held at Didsbury on Friday, Oct. 9, and the Exhibition Grounds will be the mecca for upwards of 1000 school students. Innisfail, Bowden, Olds, Didsbury, Carstairs and Crossfield Public and High Schools will compete in the events. The following is the program for the day:

- |       |                            |                     |         |
|-------|----------------------------|---------------------|---------|
| 10.30 | Senior A Boys              | 100 yards dash      | Track   |
|       | Senior A Girls             | Standing broad jump | Pit 1   |
|       | Senior B Girls             | Standing broad jump | Pit 2   |
|       | Inter A Girls              | Standing broad jump | Pit 3   |
|       | Inter B Girls              | Standing broad jump | Pit 4   |
|       | Junior Girls               | Standing broad jump | Pit 5   |
| 10.35 | Senior B Boys              | 100 yards dash      | Track   |
| 10.40 | Inter A Boys               | 100 yards dash      | Track   |
| 10.45 | Inter B Boys               | 100 yards dash      | Track   |
| 10.45 | Senior A Boys              | Shot put            | Infield |
| 10.50 | Junior Boys                | 50 yards dash       | Track   |
| 11.00 | Senior A Girls             | 50 yards dash       | Track   |
|       | Senior A Boys              | Standing broad jump | Pit 1   |
|       | Senior B Boys              | Standing broad jump | Pit 2   |
|       | Inter A Boys               | Standing broad jump | Pit 3   |
|       | Inter B Boys               | Standing broad jump | Pit 4   |
|       | Junior Boys                | Standing broad jump | Pit 5   |
| 11.05 | Senior B Girls             | 50 yards dash       | Track   |
| 11.10 | Inter A Girls              | 50 yards dash       | Track   |
| 11.15 | Inter B Girls              | 50 yards dash       | Track   |
| 11.15 | Senior B Girls             | Softball throw      | Infield |
| 11.20 | Junior Girls               | 50 yards dash       | Track   |
| 11.30 | Senior A Girls             | Running broad jump  | Pit 1   |
|       | Inter A Girls              | Running broad jump  | Pit 3   |
|       | Inter B Girls              | Running broad jump  | Pit 4   |
|       | Junior Girls               | Running broad jump  | Pit 5   |
| 11.40 | Senior B Girls             | Running broad jump  | Pit 2   |
|       | Inter B Boys               | Shot put            | Infield |
|       | Open Boys' Half Mile Race  |                     | Track   |
| 12.00 | LUNCH                      |                     |         |
| 1.00  | Senior A Girls             | Softball throw      | Infield |
|       | Senior A Boys              | Running broad jump  | Pit 1   |
|       | Senior B Boys              | Running broad jump  | Pit 2   |
|       | Inter A Boys               | Running broad jump  | Pit 3   |
|       | Inter B Boys               | Running broad jump  | Pit 4   |
|       | Junior Boys                | Running broad jump  | Pit 5   |
| 1.20  | Inter A Girls              | Softball throw      | Infield |
| 1.30  | Senior A Boys              | 220 yards dash      | Track   |
|       | Senior A Girls             | Hop, step and jump  | Pit 1   |
|       | Senior B Girls             | Hop, step and jump  | Pit 2   |
| 1.30  | Inter B Girls              | Hop, step and jump  | Pit 4   |
|       | Junior Girls               | Hop, step and jump  | Pit 5   |
| 1.35  | Senior B Boys              | 220 yards dash      | Track   |
| 1.40  | Inter A Boys               | 220 yards dash      | Track   |
|       | Inter A Girls              | Hop, step and jump  | Pit 3   |
|       | Senior B Boys              | Shot put            | Infield |
| 1.45  | Inter B Boys               | 220 yards dash      | Track   |
| 1.50  | Junior Boys                | 75 yards dash       | Track   |
| 2.00  | Senior A Girls             | 100 yards dash      | Track   |
|       | Senior A Boys              | Pole vault          | Pit 1   |
|       | Senior B Boys              | Hop, step and jump  | Pit 2   |
|       | Inter A Boys               | Hop, step and jump  | Pit 3   |
|       | Inter B Boys               | Hop, step and jump  | Pit 4   |
|       | Junior Boys                | Hop, step and jump  | Pit 5   |
| 2.05  | Senior B Girls             | 100 yards dash      | Track   |
| 2.10  | Inter A Girls              | 75 yards dash       | Track   |
| 2.15  | Inter B Girls              | 75 yards dash       | Track   |
| 2.20  | Junior Girls               | 75 yards dash       | Track   |
| 2.30  | Senior A Boys              | Hop, step and jump  | Pit 1   |
|       | Senior B Boys              | Pole vault          | Pit 2   |
|       | Inter A Boys               | High jump           | Pit 3   |
|       | Inter B Boys               | High jump           | Pit 4   |
|       | Inter B Girls              | Softball Throw      | Infield |
| 3.00  | Quarter-mile relay race    | Girls               | Track   |
|       | Senior A Boys              | High jump           | Pit 1   |
|       | Senior B Boys              | High jump           | Pit 2   |
|       | Inter A Boys               | Pole vault          | Pit 3   |
|       | Junior Boys                | High jump           | Pit 5   |
| 3.30  | Junior Boys                | Softball Throw      | Infield |
| 3.30  | Senior A Boys              | 440 yard dash       | Track   |
|       | Senior A Girls             | High jump           | Pit 1   |
|       | Senior B Girls             | High jump           | Pit 2   |
|       | Inter A Girls              | High jump           | Pit 3   |
|       | Inter B Girls              | High jump           | Pit 4   |
|       | Junior Girls               | High jump           | Pit 5   |
| 3.40  | Inter A Boys               | Shot put            | Infield |
| 3.45  | Inter B Boys               | Pole vault          | Pit 4   |
| 4.20  | Boys' half-mile relay race |                     | Track   |
| 5.00  | Tea                        |                     |         |

being close to boards or against fences or sheds. Ashes that are not hot enough to set fire to wood will char it, and when hot coals strike this charred surface the charcoal on it will take fire, and if a layer of charcoal on this surface gets any fat or grease against it—it will take fire and burn the box or house of which the board is a part. A wooden ash box is very dangerous unless placed in the open away from all buildings and fences.

Ashes stored in the cellar should be kept clean and free of other refuse. In the house they should be kept only in a metal can with a tight cover. Hot ashes do not have to be VERY hot to ignite the waste in an ash pile.

Examine your premises TODAY. Check up on your own method of disposal of ashes. PLAY SAFE.

## Country Elevators AND Grain Marketing

Elevator companies, including the Pools, are members of the Winnipeg Grain Exchange and use it in exactly the same manner and for exactly the same reason. They use it because the futures market is the best method which has been so far devised to protect the farmer and to ensure low handling charges. It is not used by either the Pools or the other elevator companies for the purposes of profit.

The Pooling method, which is the only other method which has been tried to date in Canada, cost the West many millions of dollars. It is no longer seriously advocated, even by those who invented it. If in the future any organization, commission or government can evolve a system of marketing Canada's crop which will consistently return to the farmer even a fraction of a cent more than he obtains through the present methods, the line elevator companies will be the first to endorse and adopt such a system. At the present time all elevator companies (including the Pools) market grain in exactly the same way because it is the best and cheapest way which has yet been devised.

Fair competition is the farmers' safeguard.

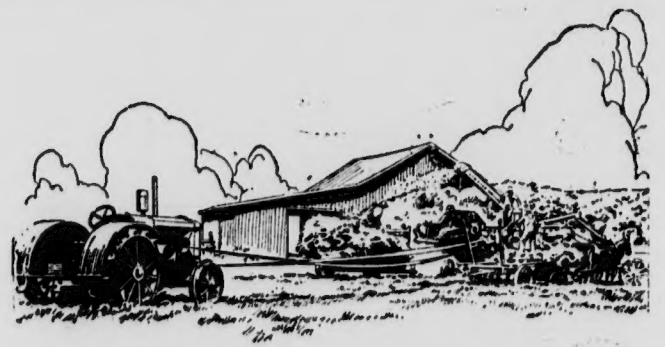

Propaganda by the Pools, through the Western Producer, country newspapers and field meetings, attacking the elevator companies because of marketing methods which the Pools themselves adopt, is untrue and hypocritical and merely designed to abolish the competition which is the farmers' best protection.

## The Big Tractor For Big Threshers

Here's the tractor that will handle the largest threshers and silo fillers with ample power for steady operation, and the in-built ability to handle sudden over-loads. It is the Oliver Hart-Parr 28-44—the tractor that's in a class by itself.

The belt pulley and power take-off are easily operated from the driver's seat, and the ability to back into the belt with a "dead belt pulley" is one of its many advantages.

For more profitable threshing, belt an Oliver Hart-Parr 28-44 to an Oliver Red River Special Thresher, or hook it up to an Oliver Nichols & Shepard Combine. We will appreciate your letting us tell you more about this hardy, powerful tractor. It's a big tractor for big farm jobs.

**Burnside Notes.**

Dance in Lone Pine Hall next Friday evening, October 9th, to the music furnished by the newly organized Didsbury Five-Piece Orchestra.

Lone Pine W.I. will meet at the Hall on Thursday, October 8. Mrs. Eckel will have charge of the topic, "Legislation."

Mr. George Metz was a visitor to the southern city on Saturday.

Mrs. George Hergert of Calgary is visiting her son, Mr. Otto Bittner, and other relatives in the district.

Miss Una and Mr. Oswald Jenkins were Sunday visitors with Mr. and Mrs. Sam Elliott.

Earl Dedels and Dick Metz were Sunday dinner guests with Mr. and Mrs. Otto Bittner.

Mr. and Mrs. Bob McCulloch have returned from Banff where Bob has been driving a bus for Brewster.

Miss Bernice Coulter of Abbey, Sask., who is visiting Mrs. J. E. Gooder, spent the weekend with Misses Sadie and Bertie McLean.

**Melvin Notes.**

Mr. E. McComb of Calgary called on Mr. and Mrs. Chas. Youngs on Monday evening.

Mr. and Mrs. Roy Shaw spent the weekend with Mr. Shaw's father at Vulcan, Alberta.

Mr. and Mrs. Irwin Klein were Sunday visitors with Mr. and Mrs. August Krebs.

Mrs. P. Daniels of Calgary is a visitor with her parents, Mr. and Mrs. Godfrey Carlson.

Mr. and Mrs. Tom Duncan and Betty, and Mrs. Bellway of Calgary, spent Sunday with Mr. and Mrs. George Youngs.

Guests of Mrs. Peter Johnston on Sunday were Mr. and Mrs. Glen Johnston and family, and Mr. and Mrs. Jesse Ray and Rita.

Mr. and Mrs. John Krueger spent a few days last week in Calgary. During their absence Mrs. Andrew Peck and Billie stayed with Mrs. Peck's mother, Mrs. Webster.

**Westcott Notes.**

The September meeting of the Westcott Women's Institute met at the home of Mrs. E. Owens, with eighteen members and three visitors present. The meeting opened with the singing of "The Land of the Maple" and repetition of the Creed. Roll-call was answered by giving the uses of remnant, yarn, etc. and showing something made from a remnant. Plans were then made for the fall bazaar, which is to be held on Friday evening, October 23, at 8 o'clock. The program committee for the bazaar consists of Mrs. Frank Dexter, Mrs. Ed. Klinck and Miss Mildred Levagood. A fish pond for the children was put in charge of Mrs. John Spillman. Price to fish 15c. Instead of raffling a quilt as usual, a tea set will be raffled, for which the tickets will be prepared by Mrs. Alex Robertson. Lunch will be served at the close. Admission to the bazaar will be 25c for adults, children under 15 years free.

After some community singing, a paper on Handicrafts was given by Mrs. Harry Levagood, and a good discussion followed. She also gave the story of her bus trip and showed many pictures to illustrate. The meeting was brought to a close by singing "God Save the King," and lunch was served by the hostess. The October meeting will be held at the home of Mrs. John Spillman.

**Doings of Our Neighbors**

**AT OLDS:** Mr. G. H. Cipperley and son Melvin left Wednesday last by plane for Iowa, where they will visit at Sioux City and other points. They are travelling in the Kari-Keen coupe recently rebuilt by Melvin, and plan to take the transcontinental airline route after reaching the border.

**Mountain View Notes**

An unusually successful meeting of Mountain View W.I. was held at the home of Mrs. E. L. St. Clair on Thursday, September 17, twenty-six members and friends being present. Miss Marie Chambers gave a most interesting talk and demonstration on the "Selection and Use of Cosmetics." Several gift boxes of make-up were raffled off by the speaker. The names of Mrs. W. Imm and Mrs. L. B. Fulkert were added to the Roll. The members join in wishing them welcome. The next meeting is to be held at Community Hall on October 15. Members are requested to bring print pieces for the quilt. A hearty vote of thanks was given to Mrs. St. Clair for her hospitality.

process of re-orientation upon the Conservative side of the scale. It is a process which will have a profound effect upon the future of the country. We doubt if any of the members of the Conservative Party are aware of the fact that the Conservative Party is now in a position to win a majority in the House of Commons. This is due to the fact that the Conservative Party has been able to attract a large number of new members to its ranks. This is a very important development for the Conservative Party, as it shows that the party is still popular with the people. The Conservative Party should take advantage of this position and work to win a majority in the House of Commons. This would allow the party to implement its policies and bring about the changes that the people desire.

**DON'T SPOIL YOUR SAVINGS**

THE accumulated assets of the life insurance policy-holders of Canada are the largest—by far the largest—single class of investment holdings in the country. They include every type of non-speculative investment, but owing to the nature of the insurance contract the greater part of them consists of credit claims against property, with principal and interest payable in fixed dollar amounts, rather than ownership equities whose value and income depend upon earnings. The owners of these investments are only nominally the insurance companies themselves, some of which are wholly mutualized, and all of which administer total funds in which the shareholders' proportion is an almost infinitesimal part; the real owners are the policy-holders themselves. And in spite of the existence of a fair number of very large policies which may be regarded as a class of rich men's investments, the typical policy holding is a matter of a few hundreds or thousands of dollars, the chief asset and the metaphorical anchor to windward of some industrial, commercial or professional worker who has not accumulated and never will accumulate any other important asset.

No act of destruction or partial destruction of the value of any such credit claim, be it a government bond, a municipal bond, a public utility bond, a railway bond, an industrial bond or an ordinary property mortgage, can ever fail to impair the assets of the life insurance policy-holders of the country. Any widespread destruction of such values must necessarily render the assets of the policy-holders inadequate to perform the function for which those policy-holders rely upon them. The same is true of any tampering with the value of the unit of currency in which these credit claims are expressed. Policy-holders who have any real regard for the interests of their beneficiaries—the women and children for whose benefit the vast majority of life insurance policies are taken out—should set their faces immutably against all government tendencies leading to partial or complete repudiation of debt contracts, for such tendencies are destructive to the whole system of insurance.

The object of insurance is to make something sure. The effect of repudiation is to make everything unsure.

★ This editorial, taken from "Saturday Night", Toronto, is so timely and informative that it is reproduced here as one of a series of messages sponsored by Life Insurance Companies in Canada.

## HAPPY SMOKES

Buckingham Fine Cut  
MILD · COOL · SMOOTHWORLD HAPPENINGS  
BRIEFLY TOLD

George Simpson, 69, formerly well known in newspaper circles and editor of House of Commons Debates, died in hospital at Ottawa.

Civic census figures give Edmonton's population as 85,470, an increase of 4,000 over last year. It is the highest population figure in the city's history.

As an offering on the altar of road safety, 58 decrepit motor cars, valued at \$7,500, were set on fire and burned into twisted scraps of metal at Cape Town, S.A.

The Soviet Union is turning out about 5,000 aeroplanes a year in a gigantic building program, Louis Breguet, French builder, said upon his return from a trip to Russia.

Estimated to have been buried nearly two centuries ago, a skeleton of an Indian was unearthed at Mount Hope cemetery in Brantford, Ont., by workmen.

Farmers of southern Alberta are holding their wheat back from market, awaiting higher prices, a survey revealed. Deliveries to line elevators are far below average.

Hughenden Park, historic Buckinghamshire estate which was the home of Benjamin Disraeli, has been bought by High Wycombe Borough Council as a memorial to King George.

There is to be no hiding place for the bachelor under the Italian flag. A decree published extended to East Africa a tax of \$9.20 a year on bachelors between 25 and 30 years old and about \$12.40 on those up to 55 years.

Lieut. G. K. Horsey, the Royal Air Force pilot who crashed on the liner Normandie in Southampton Docks on June 22, was severely censured by a court martial and sentenced to retarded promotion.

## Had Struggle With Grizzly

Mountain Climbers in Rockies Attacked By Mother Bear

The story of a struggle with an enraged mother grizzly bear protecting her cubs in interior British Columbia was related by Mr. and Mrs. Don Munday, Alpinists who returned to Vancouver from an exploration trip in the Coast Range.

As they completed a hazardous passage through a 12-foot cleft in Bearpaw canyon, Mount Silverthorne, the Mundays related, they looked down on a grizzly cub standing apparently alone.

Discarding their ice-axes, they focussed their cameras on the cub but before they could take a picture the roar of the mother grizzly distracted their attention.

She was standing on the same ledge as they, 30 feet away.

Unarmed, the Mundays began to yell, but the mother bear started her advance. About a yard away she swerved off but came back a moment later more fiercely than ever.

Finally Mrs. Munday succeeded in recovering one of the axes and, as the bear made a rush at Mr. Munday, causing him to trip, she rushed at the bear with up-raised axe and drove it off.

## Plant Out Of Place

A weed may be described as a plant out of place; by its unsightly appearance, its pernicious habits of growth, method of spreading by root stalks and seed, it becomes a real menace to agriculture regardless of whether it is growing on highways, by-ways, public or private property.

## City Of The Future

A city of the future, designed for airplane and automobile commuters, with streets radiating from the centrally located airport, is envisioned by Dr. Ludo L. Zimmer, noted industrial engineer of Cleveland, Ohio.

## International Trade

Australian Publisher Believes It Best Prevention Of War

The best prevention of war, Sir Keith Murdoch said in an interview at Montreal, would be a loosening of trade barriers and a general move to make international trade more easily possible. The Australian publisher, on his way home after a trip through Spain, France, Germany and England, said "some of the best brains in England are working on a policy of bank credits for nations which are hard up and the freeing of certain channels of trade in the hope there will be a substantial revival of trade by this means."

The porpoise devours its own weight in fish about every 48 hours.

## Working To Music

English Motor Company Finds It Creates Cheerful Atmosphere

Music has many uses outside of the field of amusement and entertainment. It has been said that music has the power to soothe the savage beast; that blasts from a trumpet of minor chords will cause a ferocious lion to turn tail; that music at the proper tempo will induce pupils in school to do neater writing.

The Standard Motor Co., Limited, Canley, Coventry, England, one of the largest automobile manufacturers in that country, has found that the broadcasting of music in part of their factory has had a beneficial effect on the spirit of the workers, has created a cheerful atmosphere, and has caused no deterioration in efficiency and careful workmanship.

—Oshawa Times.

## Expected Too Much

She said dreamily to him: "Yes, I could love a poor man." He asked her: "Then why not marry me?" She dreamily continued: "But I could not love a poor man enough to have the alarm clock wake me out of pleasant dreams to get up and make his coffee and fry an egg before he went to work every morning." And he said rudely: "Who said anything about there being an egg to fry?"

## You'll Crochet Your Way to Flattery

Household  
Arts  
by  
Alice  
Brooks

It's  
Done  
in the  
Easiest  
of  
Stitches

## PATTERN 5679

Crochet your way to inexpensive flattery with this fetching, easily-made blouse of colored yarn. And if it's a smart "two-piecer" your wardrobe needs, order pattern 5353—a trim skirt of plain crochet. This engaging blouse with its graceful jabot in open net stitch is made entirely in the simple lace stitch shown in the detail. Quickly made—this outfit! In pattern 5679 you will find instructions for making the blouse shown with long or short sleeves in sizes 16-18 and 38-40 (all given in one pattern); an illustration of it and of all the stitches needed; material requirements. Price 20 cents. In pattern 5353 you will find complete instructions for making the skirt shown in sizes 16-18 and 38-40; an illustration of it and of all stitches needed; material requirements. Price 20 cents.

To obtain these patterns send 20 cents each (40 cents for both) in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## EDMONTON "GRADS" HOME AFTER SUCCESSFUL EUROPEAN TOUR

The famous Edmonton "Grads" basketball team, generally conceded to be the finest aggregation of female basketball players in the world, has just returned to Canada after a successful "invasion" of Europe and the Mother Country. Standing on the deck of the "Empress of Britain" as she docked at Quebec, the members of the team are (front row, left to right), Helen Northup, Doris Heale, Babe Belanger and Etta Dann. (Back row, left to right), Sophie Brown, Mabel Bunton, Gladys Fry, J. P. Page, the well-known manager of the team, and Noel Macdonald. The girls are wearing their Olympic blazers.

## Canadians Small Meat Eaters

Average For New Zealand And Australia Much Higher

The average Canadian family uses three times as much milk as the average New Zealand family, but, on the other hand, it uses less butter and cheese and only about half as much meat.

Although the people of this somewhat cold northern country would really be expected to eat a good deal of meat, the average amount consumed per person is only 137 pounds a year, while the average used per person in New Zealand and Australia, both with balmy climates than Canada's, is 247 pounds and 213 pounds respectively. Our Antipodean cousins should be good at heavy work and at sports that test the athlete's strength.

The above facts are taken from statistics published by the New Zealand government, which also show that New Zealanders butter their bread more thickly than do the people of Great Britain, Australia or Canada, but that when it comes to eating cheese our friends in Britain take first place. The average consumption there is 9½ pounds per year, as against 3½ in Canada.

We eat only half as much beef, relatively, as the people of Australia and New Zealand—though only a little less than those in Britain—and we eat only a fraction of the amount of mutton and lamb consumed in the southern Dominions, but Canadians are fond of pork, ham and bacon. We eat 75 pounds per person, as against 17 pounds in New Zealand, 19 pounds in Australia and 46 pounds in Britain. Canadians also have a taste for poultry and eat a good deal more than the New Zealanders.

Just how we compare in regard to potatoes and spinach the story does not tell.—Winnipeg Free Press.

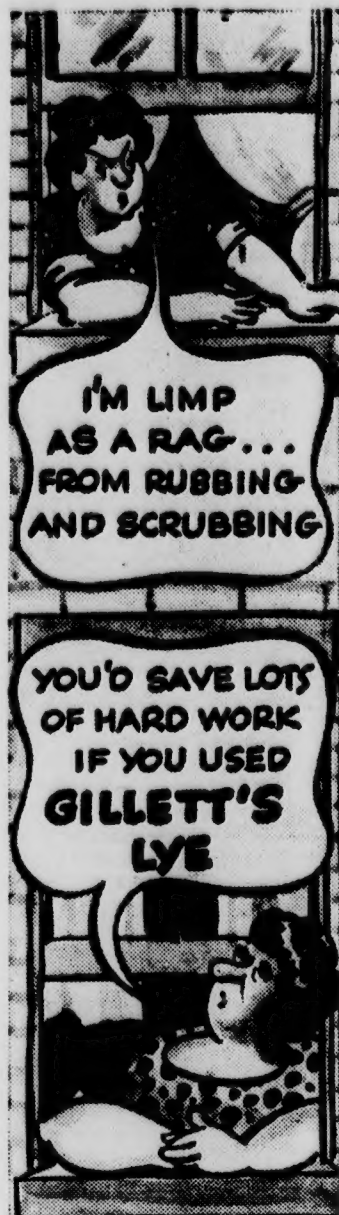

## Air-Conditioned Rooms

Will Definitely Ensure Better Work In Hot Weather

You can do better work in an air-conditioned room in hot weather. You can not count on such a room to reduce colds at any season.

These are applications of air conditioning to normal life, presented at the Harvard tercentenary celebration in a symposium on environment by Philip Drinker, professor of industrial hygiene at the Harvard school of public health.

"Will we have fewer colds," Prof. Drinker asked, "if we control the humidity in our homes, if we ionize the air, or if we sterilize it with ultra-violet light? It would be pleasant to answer these questions positively, but at the present time there are no data from any source which we have seen, which justify affirmative answers."

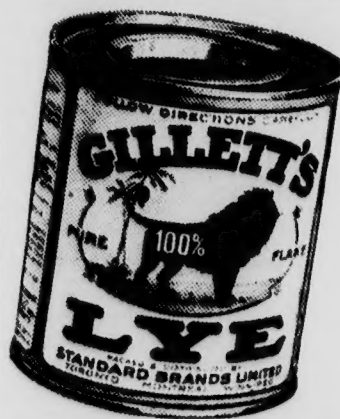

I'M LIMP  
AS A RAG...  
FROM RUBBING-  
AND SCRUBBING

YOU'D SAVE LOTS  
OF HARD WORK  
IF YOU USED  
GILLETT'S  
LYE

WASHES  
DIRT AWAY  
—no rubbing  
and scrubbing

Cleaning jobs are quick and easy with Gillett's Pure Flake Lye. Use a solution of 1 teaspoonful dissolved in a quart of cold water. Off comes the dirt! And you do no hard rubbing. Use it for toilet bowls, too—and to clear sluggish drains. It kills germs, destroys odors. Never harms enamel or plumbing. Get a tin from your grocer—today!

\*Never dissolve lye in hot water. The action of the lye itself heats the water.

**FREE BOOKLET**—The handy Gillett's Lye Booklet shows how this powerful cleaner and disinfectant can save you hard work... contains complete instructions for making soap at home... tells how to keep farm equipment and buildings clean and sanitary. Be sure to send for free copy. Just write: Standard Brands Ltd., Fraser Ave. & Liberty St., Toronto, Ont.

## World Speed Record

Made By Stream-Lined Jubilee Express In England

The stream-lined silver jubilee express of the London and Northeastern railway, running from Newcastle-on-Tyne to London, established a new speed record for British trains by reaching a maximum speed of 113 miles an hour.

The train, excluding the engine, passengers and baggage, weighed 270 tons. The figure is believed to be a world record for a streamlined passenger train.

Always a lover of beauty we are working upon motoring glasses that will enable you to look at the landscape without seeing the hot-dog stands.

## RHEUMATISM SPREAD TO ALL HER JOINTS

### Obtained Relief by Using Kruschen Salts

Here is a sad story of suffering, but it has a happy ending. This woman was attacked by severe rheumatism which spread to all her joints. But Kruschen brought relief as she describes below:

"I feel it my duty to tell you how Kruschen Salts brought me relief from a severe attack of rheumatism. I had rheumatism in my legs and knees, later spreading to every joint in my body. This lasted over a period of 13 weeks. I was then ordered to bed with acute rheumatism. I was recommended to try Kruschen and before finishing the second bottle I was able to perform my normal duties."—(Mrs.) I.D.

Rheumatic conditions are frequently due to an excess of uric acid in the body. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid. Other ingredients in these Salts assist Nature to expel the dissolved uric acid through the natural channels.

## Thou Shalt Not Love

— A NOVEL BY —  
GEORGIA GRAIG

CHAPTER V.—Continued

Starr thought she had never seen anything quite so comfortable as the man-sort of place with its crimson leather chairs, bookcases with dim lights over them and low, comfortable chairs, each with its own particular light. There were scatter rugs, dim-hued and velvety and the gleam of copper or brass here and there, and—she held her breath

as it took her straight back home—a painting on one wall of Egyptian gods and goddesses who stood in their stiff-posed starkness of dress, with geometrical hands and draped bodies making the same old mysterious signs at each other, signaling.

The man caught Starr's eyes, saw something in them he did not understand, nor did he care.

"Just a few of your pals," he said. "Thought you might like them. You might catch up a bit of chatter with them while I tell Yu'an what we'd like to eat."

Over the supper they talked, undisturbed. But it was a talk of such consequence that it was a table of scarcely touched food as their eyes held each other's in long moment of appraisal.

The man's elbows rested on the table and he leaned close. The girl's slim fingers twisted nervously in her lap as her glance flashed to where she had dropped her coat on a red leather chair. A faint color crept beneath the pallor of her cheeks, feeling him look at her the way he was looking.

It was then, after they had fenced to the point of one or the other lunging for a body blow, that he made the most astounding proposition a man ever made to a girl.

He explained in his clipped voice: "There hasn't appeared any particular need for mentioning it before, but my name is Michael Fairbourne. The next in the biography confession is that I work for the Tarrance Publishing Company. One of our recent novels is 'Play-Girl.' Heard of it?"

Starr nodded. Heard of it? Who hadn't? "Play-Girl" was on everybody's lips. One of those sensational best-sellers which come once in a blue moon. Some of them come every few years, of course; others are in the "Three Weeks" class and make a devastating disturbance of their own. But it was the consensus of opinion

## WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

that "Three Weeks" was a Victorian and skimmilk sort of tome, one which ought to be on every Sunday-School library shelf compared with "Play-Girl." "Play-Girl"—a daring, risqué story of an ultra-modern woman's love—and sin. Her own unregenerate, unrepentant life story—of a life still too young really to be called a life, but—

Michael Fairbourne said curtly: "I wrote it."

Starr caught her breath incredulously. "You? You wrote it? But I thought—"

"So does everybody else," he said grimly. His face was as flushed as her own, and he appeared to be uncertain just how he wanted to continue. But he plunged on headlong. "The company I work for ballyhooed it as the confession story of a woman who had sinned, a true story written by the anonymous 'Play-Girl' herself." He shrugged his big shoulders and waited the space of time it took him to light a cigarette. "That's baloney, of course. I wrote the thing on an impulse, and it got away from me. Have you ever known the feeling of starting a small thing rolling, much as you've probably made a snowball when you were a kid, and then finding that it

has grown wildly beyond your control? Well, that's what happened to 'Play-Girl.' The last thing I ever dreamed of in the world was that it would cause such a sensation. Now the public is clamoring for the author to be revealed—a sort of 'personal appearance' command, as it were, and my publisher demands that I either simper forward and confess myself the damn fool author of the damn fool book, or else produce an author who would be more in keeping."

Starr interrupted, not understanding what he was driving at. Her acquaintanceship with publishers had been with those who had published her father's tomes on archæology. It had not occurred that any person could go to the tremendous trouble of putting down on paper enough words to fill a whole book and then shrink from the acclaim of authorship.

"Well," she asked wonderingly, "why don't you admit your identity and take the fame that's coming to you? I should think it would be marvelous to be a real author."

"Who? Me?" Michael snapped, and he gave a short laugh. "Fame? Notoriety's the word! And certainly no credit to the kind of masculine brain that could evolve such truck. No I can't do it."

"Why did you write it then?" Starr wondered, but he was paying her no attention.

"I might as well make a clean breast of the whole thing while I'm about it," he said, as his jaw clamped firmly. "Truth is, there's a girl I hope to marry, Stephanie Dale. The Dales are one of the oldest, proudest families in New York,—which might not be saying a great deal, at that, except that they're among the few real old New Yorkers who still talk a great deal about dear old Uncle Great-great-and-so-on Peter Stuyvesant and make their family prayers to a wooden leg. That old hokey means a lot of them yet, and if they ever found out that I was the author of the scandalous 'Play-Girl,' it would be all off between me and Stephanie."

Starr said, "Oh!" very softly. Those few words of his spoke volumes about the life of Michael Fairbourne. Not for nothing had she been born in the shadow of Old South Church and been reared in the rarified atmosphere that spreads over Beacon Hill. Though not for worlds would she ever have had Michael Fairbourne guess that—not now. But somehow she hated to think of him in the role of social climber. To any extent. It just didn't seem to fit.

The hard young face so near to hers was very intent. Apparently the scheme of things he had mapped out for himself meant a great deal to Starr's Broadway "Hassan." Suddenly he was talking to her as intimately as though he had known her a lifetime. Much as if it were a relief to express in words the thoughts he had been forced to keep to himself. He went to great lengths to explain himself to the black-eyed wrath of a girl opposite him, in a burst of almost boyish earnestness.

"You see, even if Stephanie did not complicate matters, and if it did not look so silly for a big lummock like me to have got any such effusion out of his system, I still could not reveal myself without making a lot of others look as assinine as myself. The author of 'Play-Girl' has got to be 'Play-Girl' herself. Otherwise the whole thing would be exposed as a gigantic hoax. . . . It isn't done—not any more, if you get what I mean, and know anything about the publishing business. My publishers are not looking for hoaxes. That would ruin the sale of my book, and baby! are we going strong! It would ruin them—and me, which is more to the point!"

Starr asked quietly: "And just where do I figure in this intriguing little story?"

Michael Fairbourne smiled audaciously and leaned back, watching the play of her features.

"You," he said with slow emphasis, "are going to make your debut in New York City as the notorious 'Play-Girl' the woman who lived my story, and yes, by heaven, who wrote it, too, without a single ghost. You look as if you could have."

Starr drew a long, startled breath. For a second things went dizzy and the little flames in the fireplace were dancing a funny little devil's dance. She had a confused impression of burning gray eyes, a laughing mouth, and the spell of a man's attraction

## WRAPPED AIR-TIGHT

LARGE SIZE  
PATENTED FLAT LAYER  
WILL GIVE MANY MORE  
HOURS THAN ANY OTHER BATTERY

**THE ONLY BATTERY BUILT IN LAYERS..**

**M**OST "B" BATTERIES look very much alike on the outside. But it isn't what a battery looks like that counts—but what it does. Underneath the jacket of some brands of batteries, are small round cells. The heart of a Layerbilt is a series of tightly packed layers. In the old-fashioned round-cell type, note the waste space in the "Air Pockets" around the cells. But the Layerbilt is all battery—solid layers containing 25% more power-making materials than a round-cell battery of the same size.

And because the exclusive construction uses up the maximum of these materials, Layerbilt gives 40% more power. Layerbilt costs a little more at first—but saves you plenty in the end. Of all "B" batteries on the market, Layerbilt gives you "More Hours per Dollar"—longer life, trouble-free service.

This year—Layerbilt comes to you with an extra improvement—the "plug-in" which eliminates all terminal posts and gives you only one connection for each "B" battery.

Mr. and Mrs. H. J. Siebert, who had been visiting the latter's sisters, Mrs. W. Rupp and Mrs. Ed Rieder, left on Friday enroute for their home at Canada, Kansas. They will visit California and Texas on their way home.

Fred Aastrup was the winner at the Didsbury Gun Club's annual shoot for the Turvey trophy, with a score of 38 out of a possible 50. There were six contestants and I. Klein took second place with a score of 32.

The Ladies Aid of the Evangelical Church will serve a Thanksgiving Dinner in the basement of the Church on Friday, October 9, from 6 to 8 p.m. A lantern lecture on "Palestine" will be given by Rev. A. S. Caughell at 8:30. Admission to dinner and lecture 35 cents.

Messrs. A. Brusso and A. McNaughton, the municipal secretaries were in Olds on Tuesday, making arrangements to open an office there for the collection of taxes and other business. They plan to be in Olds every Tuesday until the end of the year.

Weekend Special—5 Pairs Wool Sox for \$1.00 at T. E. Scott's.

October meeting of the W.C.T.U. will be held October 15th instead of October 8th, in order that the report of the provincial convention being held in Edmonton on the 6th, 7th and 8th, may be given by the delegate, Mrs. Rev. Geeson.

## Swine Breeders' Field Day, Lacombe, Saturday, October 17

There are many problems in connection with the raising of hogs on the average farm in Alberta. In the spring of 1936 the losses of young pigs were extremely heavy. Most of these losses might have been prevented if proper methods of housing, feeding and management had been used. These methods are effective, and not expensive.

A program to discuss the problems of the practical farmer is being arranged. Remember the date, Saturday, October 17, and plan to visit the Experimental Station at Lacombe for this very important field day on swine raising. Watch this paper for further details and the program.

## SOCIAL CREDIT NOTES

The Didsbury Social Credit Study Group No. 1 held a meeting Sept. 26 at the home Mr. and Mrs. A. Schwesinger. After minutes were read correspondence was dealt with, and the evening was taken up with very important business. During the lunch period Miss Schwesinger served the members with some of her birthday cake on which reposed 19 candles brightly burning. Avote of thanks was tendered the host and hostess. Next meeting will be held on Monday at the home of Mr. and Mrs. F. Hughes.

Mrs. A. Schwesinger, Sec.-Treas.

Didsbury Pioneer Social Credit Group held its last meeting at the home of Mrs. Ada Stevens last Monday evening. Main business of the evening was on ways and means of giving the provincial government greater co-operation in putting over the social credit scheme. It was decided that the most necessary move now for the local groups was to get the zone reorganized, and a motion was passed to ask the zone manager and constituency executive to call a meeting in the near future for that purpose; of having the zone organization take up the question of getting a co-operative store established in Didsbury. Communications from other groups in the zone who are taking a similar attitude were discussed, and it was decided to support them in this move. Next meeting will be held on Monday evening, October 5th, 8 p.m. at the home of Matthew Green.

H. Erb, Secretary.
